PLANTERS' BULLETIN

OF THE RUBBER RESEARCH INSTITUTE OF MALAYA

A MEDIUM OF THE R.R.I.M.'S SERVICE TO ESTATES
Articles are of direct practical use to planters.
Publication is on the first of each alternate month, issues being successively numbered.

19 65

23 FEB 1966

RRIM

LOCATION. The institute's laboratories and offices at the third mile, Ampang Road, Kuala Lumpur are open from 8 am to 12.45 pm and 2 pm to 4 pm on Mondays to Fridays, and from 8 am to 12.30 pm on Saturdays.

EXPERIMENT STATION AND FACTORY. This station of the R R I M is situated 16 miles from Kuala Lumpur, at Sungei Buloh on the Kuala Lumpur — Kepong — Kuala Selangor road. Visits may be made on Mondays or Wednesdays by arrangement. There is a guest house.

CORRESPONDENCE. ALL LETTERS must be addressed to the Director, Rubber Research Institute of Malaya, Post Office Box 150, Kuala Lumpur. Special enquires may be marked for the attention of particular officers. The address for TELEGRAMS is Searching, Kuala Lumpur. TELEPHONE: Kuala Lumpur 72521. PARCELS occasionally arrive without any indication of their origin. Senders' names and addresses should be written clearly on the outside of all packages, and advice of despatch should be given by letter or telegram.

PROHIBITED PLANT SPECIMENS. Attention of planters and others in territories outside Malaya and Singapore is drawn to the Malayan Plant Importation Rules which prohibit the importation into Malaya of any part of a plant, whether living or dead, unless it is accompanied by a permit issued by the Director of Agriculture, Malaya. No permit will be issued in respect of any diseased plant or any plant pest. Any plant imported in contravention of these Rules (whose object is to prevent the introduction of diseases or pests) will be destroyed without examination. Anyone outside Malaya who desires our advice on any matter that may require examination of living material must first enquire by letter.

ADVICE. Enquiries are invited from rubber producers in Malaysia, Singapore, Brunei and Nigeria who may require more detailed information applicable to their own special problems. Where it is considered necessary, visits will be made to estates in Malaya as convenient. Visits to estates in other territories are by special arrangement. The only visits for which charges are normally made are those of our clone indentification inspectors. INTERVIEWS should be arranged by letter, as members of the senior research and advisory staff are frequently absent on visits to plantations.

PUBLICATIONS. Subscription to all or any of our series of publications (*Planters' Bulletin, Journal, Reports*, and miscellaneous booklets) may be made by depositing $15 with us. An annual statement of account will then be submitted. We are unable to give annual subscription rates or any form of discount, but for multiple subscriptions a lower rate of initial deposit is acceptable. Postage is charged on oversea mailings. A list of 'Publications of the RRIM' is available on request.

PLANTERS' BULLETIN

OF THE RUBBER RESEARCH INSTITUTE OF MALAYA

Kuala Lumpur 1965 Main Contents

Planters' Bulletin 76

	Page
Editorial: Choice of Planting Material	1
Planting Recommendations 1965–66	3
RRIM 600 Series Clones	8
RRIM 600 Series Clones in Estate Trials	10
Foreign Exchange Clones	18
RRIM 700 Series Clones Trials: First Report	23
Performance of Clones in Commercial Practice: First Report	25
Notes: Patent	32
Freeing Exchange Clones	33
Hevea Crumb: A New Development	33
Conference of the International Standards Organisation	34

Planters' Bulletin 77

Editorial: Profits from Good Husbandry	35
Fertiliser Requirements of Mature Rubber	36
Effect of Fertilisers and Cover Plants on Early Yield of Young Rubber	56
The Response of Smallholding Rubber to Fertiliser	64
Baling Press for Comminuted Rubber	69
Note: Suspected Virus of *Hevea*	73

Planters' Bulletin 78

Editorial: Standard Malaysian Rubbers	75
Press Statement: Standard Malaysian Rubbers	77
How to Join the SMR Scheme	79
Standard Malaysian Rubbers: Specification and Sampling Procedure for Producers	81
Estate and Factory Practice for the Production of SMR	89
Green Budding: Result of a Survey of Estate Experience	99
Disodium Methylarsonate, a Useful Herbicide	103
Notes: Tariff Concession	105
Notes on the Height of Opening Budded Trees brought Late Into Tapping	105
Sustained Effectiveness of Collar Protectant Dressings	107
Journal: Volume 18 Part 4	108
Volume 18 Part 5	110
Pests of Hevea Plantations in Malaya	111

Planters' Bulletin 79

	Page
Editorial: Towards a More Rational Exploitation of the Tree	113
Identification of Plants on Malayan Rubber Estates: Plates 41–48, Wild Legumes	114
Planting Materials Used on Estates in Malaya, 1963	127
Notes: Fertiliser Recommendations for Mature Rubber on Inland Soils	129
New R.R.I.M. Manual: Clones of Commercial Interest	130

Planters' Bulletin 80 (Planters' Conference Issue)

Conference Review: Tapping	135
Physiological Aspects of Exploitation	139
Delimitation of the Flow Area	144
Application of Stimulants to Virgin Bark in Clone Trials	150
Influence of Depth of Tapping	158
Safety Tapping Knives and Tapping Ladders	165
A Trial with 1200-Tree Tasks	168
Progressive Reorganisation of Tapping Tasks: Sumatra	170
Exploitation of Young Rubber: Preliminary Results	177
Report on Chemara Tapping Experiments	194
The Full Spiral System of Tapping	205
Double Cut S/2.d/2.(2 × 4d/4). 100% Tapping in Young Rubber	218
Tapping Experiments on Mature Rubber	226
Economic Evaluation of Tapping Systems	236
Effect of Tapping System on Rubber Properties	245

Planters' Bulletin 81

Editorial: Above-Ground Diseases	255
Seed Gardens for Estates	257
Two Minor Leaf Diseases	261
Fungal Diseases of the Tapping Panel	263
Pink Disease	269
Notes: *Journal:* Volume 19 Part 1	276
Patent	278
Index 1965	281
